Work Experience

2022 February – 2022 December	## Senior Atlassian Consultant

Administered Atlassian products at the organization admin level. Created JIRA projects, templates, workflows, screens, fields and custom field contexts. Setup Jira "eazyBI" plug-in, to help users build custom Jira reports and charts. Developed scripts using Jira Automation and ScriptRunner to integrate Jira with external systems. I was responsible for Atlassian cloud-cloud and server-cloud migrations. Devised roadmaps using Portfolio for Jira that met project requirements. |
| **2021 September – 2022 January** | ## Senior Atlassian Consultant

I worked as an Atlassian Consultant in the Project Management team for the preparation and execution of Automation Test Scripts and Test Suites. Performed Scriptrunner tasks, including event listener and scheduled jobs. I used Selenium with Groovy and Atlassian Libraries. Implemented Interface Testing and ensured Jira is working properly after major API upgrade. Designed Jira workflows for the tests and improved test management workflow. I also trained junior IT staff on using Jira. |
| **2019 Jun – 2022-February** | ## Senior Atlassian Consultant

Excelled in maintaining relationships with existing customers by

Suggesting periodic review and upgrade of their PM infrastructure with

Atlassian Stack

Responsible migration of Jira from server to cloud and from cloud to cloud. Assessed apps on the server for their cloud usability. Prepared checklist for migration and discussed migration strategies with customers. I used Jira Cloud Migration Assistant and Jira Cloud Migration Assistant heavily to help customers migrate their Atlassian apps to Cloud without any problem.

Prepared a detailed cost estimation for both Jira Data center and Cloud. Included not only license costs but also the operational costs of managing Atlassian apps in server and cloud.

Setup Atlassian Access with OKTA for advanced access management and SSO.

Created solutions in Atlassian Jira to solve issues as a part of the incident Management Process.

Upgraded customers PM infrastructure with Atlassian Stack.

Participated in the entire project lifecycle for the design, development and launch of new Jira applications for a retail company; enhanced existing modules.

Developed and implemented custom workflows and scripts related processes to support software applications for the biggest Turkish Airline company.

Created custom permission schemes, notification schemes, screens on Jira Data Center.

Used most of Jira Cloud project templates.

Used both company-managed and team-managed projects on Jira Cloud. |
| **2019 Jan – 2019 Jun** | ## DevOps Consultant

Assist with the implementation of solutions architecture designs by providing technical expertise on Jenkins, Docker , Kubernetes for a company based in Eindhoven-Netherlands

Support an enterprise-class suite of monitoring, alerting, and

event management tools including Prometheus, Telegraf, and Grafana

Worked closely with embedded software developers. |

Jun 2016 –
Jan 2019

Atlassian Consultant

Worked with Atlassian tools (Jira, Bitbucket, Confluence, and Bamboo)

Designed and developed Jira workflows to company specifications.

Helped with architecting and automating cloud native technologies, deploying applications, and provisioning IaC, IaaS, or SaaS.

Furnished the bridge between the sales teams and developer teams by explaining to them the dynamics of Agile way of working with Jira.

Automated deployments for 50+ cloud servers using Bash and Atlassian add-ons

Implemented CI/CD process and release management scenarios using Atlassian Bamboo for local development team, allowing for dozens of code updates per hour with zero downtime

June 2015 –
Dec 2015

Internship

Developed various software's with .NET development technologies. I assisted the Microsoft finance team to drive their process using office tools. Learned Git and gave Git training to high school students. I also attended Summer Camp 2015.
